CEA Alliance Continues to Grow in Membership, Impact

Written by [Indoor Ag-Con](#) on June 6, 2025. Posted in [Blog](#).

Enhancing Leadership to Support Continued Growth for Indoor-Grown Produce

Washington, D.C. – Membership in the [CEA Alliance](#) continues to grow, allowing the association to increase its value and services to members and the broader controlled environment agriculture sector. The Alliance welcomes 11 new member companies during the first half of 2025:

[bio365](#)

bio365 produces a new type of growing media, designed to lower the total cost of growing while maximizing performance in CEA.

De Ruiters Seeds

De Ruiters Seed is dedicated to empowering controlled environment growers with innovative, high-quality vegetable seed solutions.

GreenFlow Solutions

GreenFlow Solutions develops innovative PVC gutter systems tailored for modern farm operations.

Grow-tec

Grow-tec is revolutionizing vertical farming with fully controlled CEA technology purpose-built for the high-yield production of fruiting vegetables—specifically tomatoes, cucumbers, and peppers.

Intelligent Growth Solutions (IGS)

IGS partners with growers to address and overcome real-world challenges with science-backed, proven technology, enabling them to produce consistent, high-quality plants.

OnePointOne

OnePointOne has developed a turn-key automated vertical farming solution for farmers, distributors and retailers.

Premier Tech

Premier Tech has a wide range of products, services, brands, and technologies allowing growers to increase crop yields, automate the handling and packaging operations of many facilities, treat and recycle water, and support companies in their digital transformation.

SEEDWAY

SEEDWAY CEA drives success for controlled environment agriculture growers by supplying a full spectrum of seed varieties, including established favorites and pioneering new cultivars.

SGS

SGS leads the way in food safety, successfully delivering innovative, tailored solutions including product testing, research & development, auditing & certification and training.

Sollum Technologies

Sollum offers a 100% dynamic LED lighting solution that modulates the full spectrum of the Sun's natural light.

Synexis®

Synexis provides pioneering biosecurity solutions for Controlled Environment Agriculture (CEA) by leveraging patented Dry Hydrogen Peroxide (DHP®) technology.

“We’re pleased to welcome these new members to the CEA Alliance,” said Alliance Chairman Steve Campione, Chief Financial Officer and Executive Vice President-Strategy for BrightFarms. “Their expertise and resources will continue to help us increase our impact in growing the CEA sector to serve our retailers and foodservice customers, delivering the freshest, highest-quality produce to consumers.”

###

The Controlled Environment Agriculture Alliance (CEA Alliance) is a membership trade association representing and serving vertical farms and greenhouse producers growing fruits and vegetables in a highly controlled indoor production environment. Controlled environment growers employ a variety of agricultural production methods and

technology to create optimal growing conditions with rigorous environmental controls. Growers utilize innovative technologies such as hydroponics, aeroponics, aquaponics, and soil-based systems to grow a wide variety of fruits and vegetables. For more information, please contact Tom Stenzel, Executive Director, at Tom@CEAlliance.com.
